

EAST MILLINOCKET SCHOOL DEPARTMENT
STUDENT TRANSPORTATION IN PRIVATE VEHICLES

Student Transportation in Private Vehicles – Field Trips

Students may be transported by employees in private vehicles with the approval of the administration. In order to protect employees and the school department, whenever this is necessary there shall be at least two adult employees present in the vehicle. In addition, all vehicles used to transport students shall have the proper insurance coverage.

No employee of the School Department will authorize any student to transport any other student in a private vehicle.

In cases where a student is enrolled in a Board approved, shared time program, or District sponsored activity, at another school or program site (Example: An area career center, gifted and talented program or dual enrollment program with an area junior college, college or university) parents of the student may request permission for their child to self-transport him/herself to and from that site, subject to rules and regulations established by the administration.
